

ARE YOU STUCK BECAUSE YOU CAN'T INSTALL NEW SOFTWARE ON YOUR OLD MACBOOK*?

Don't ditch your old Macbook,
install GNU/Linux,
and keep using it.

*or Windows PC.

If you can't install new software on your Macbook,
or that you can't update the operating system,
because it's too old,
you don't have to ditch it.
You can install GNU/Linux,
and give it a second life.
It will be fast again,
and you'll be able to install the software you want.
I can help you do so.

HOW DOES THAT WORK?

Step 1 We copy all your files on an external drive //

Step 2 We install GNU/Linux on your Macbook //

Step 3 We copy all your files back on your Macbook.

IS GNU/LINUX EASY TO USE? Yes.

LOCATION at the location of your choice in Berlin.

LANGUAGE English or French; mein Deutsch ist noch nicht gut genug, aber das ist work in progress.

PRICE sliding scale. I can adapt. Please ask. Email me.

ABOUT ME my name is Roman. I work in tech, and I do research in philosophy & technology.
